## Intern Computer Science / Computer Graphics (part-time/full-time, f/m/x)

Planblue is a diverse team of visionary entrepreneurs and engineers whose mission is to protect, explore and reveal the unknown 95% of our ocean by using cutting edge technology. We have developed the 'planblue technology': the very first intelligent software coupled with an underwater camera system, which allows automated systematic monitoring of seafloors (e.g., coral reefs, lakes, oceanic shelves), and additionally provides geo-referenced maps. The maps can be used for various applications, for underwater constructions (e.g. off-shore wind), but also aid in reducing the ecologic and economic impact of e.g. climate change or plastic waste in the ocean.

Our team currently goes through an exciting time. For us, new ideas and thinking outside the box are highly valuable, as they have led to our recent successes. We all have different fields of expertise and responsibilities, but still strongly believe in teamwork to reach our overall goals.

We offer ample challenges or opportunities, pioneering new features and methods to change this highly traditional field of underwater survey and monitoring. Bremen, where we are located, is a hotspot for state-of-the-art space underwater technologies (<https://www.planblue.com/join-us>).

To grow planblue further, we are looking for an **Intern with a background in Computer Science / Computer Graphics**

### What your position entails:

We are looking for a candidate with experience in creating simulations using game-engines. This is a very contained and independent project. The outcome (simulator) will be used to optimize the algorithms in an ideal/pre-defined environment.

The scope of the project is 3 to 6 months.

### Does this sound interesting to you?

We look forward to receiving your motivation letter, CV and/or other information you might find relevant via <https://planblue.join.com/jobs/1257841>
