
Tester in AI, UI and embedded systems (full-time/part-time, f/m/x)

Planblue is a diverse team of visionary entrepreneurs and engineers whose mission is to protect, explore and reveal the unknown 95% of our ocean by using cutting edge technology. We have developed our planblue technology which consists of AI backed software coupled with an underwater camera system and allows automated systematic monitoring of seafloors (e.g., coral reefs, lakes, oceanic shelves), providing geo-referenced maps. The maps can be used for various applications, for underwater constructions (e.g. off-shore wind), but also aid in reducing the ecologic and economic impact of e.g. climate change or plastic waste in the ocean.

Our team currently goes through an exciting time. For us, new ideas and thinking outside of the box are highly valuable, as they have led to our recent successes. We all have different fields of expertise and responsibilities, but still strongly believe in teamwork to reach our overall goals. Bremen, where we are located, is a hotspot for state-of-the-art underwater technologies and offers a great lifestyle.

To grow planblue further, we are looking for a full-time or part time **Tester**:

Your responsibilities will include:

- Carry out testing activities for
 - AI pipelines
 - embedded systems
 - web services
- Define with the team testable user stories, including acceptance criteria
- Analyse, develop and execute checks and report the results
- Pre-process test data

Qualifications we are looking for:

- IT affinity
- Creative-destructive skills (what if...)
- Discussion skills and conflict management
- Self-responsibility and openness
- Good written English
- Intermediate skills in a scripting language would be a plus
- Basics in statistics would be a plus

What we offer:

- Apply your tester mindset to help our oceans
- A bright office between Unisee and Mensa with free coffee, drinks, organic fruits, a shower and music
- Flexible working and home office hours
- Free diving courses, a lot of diving gear and business trips to diving spots
- High-end hardware of your choice
- Access to multiple fitness, yoga and other sports studios (Hansefit)
- Attending in workshops, conferences and international research projects
- Be part of a international entrepreneurial group of people who strive for diversity and love input from all team members

Does this sound interesting to you?

We look forward to receiving your motivation letter, CV and/or other information you might find relevant. Apply at Marten Ellssel (m.ellssel@planblue.com)
