

Software Developer (internship, f/m/x)

Planblue is a diverse team of visionary entrepreneurs and engineers whose mission is to protect, explore and reveal the unknown 95% of our ocean by using cutting edge technology. We have developed our planblue technology which consists of AI backed software coupled with an underwater camera system and allows automated systematic monitoring of seafloors (e.g., coral reefs, lakes, oceanic shelves), providing geo-referenced maps. The maps can be used for various applications, for underwater constructions (e.g. off-shore wind), but also aid in reducing the ecologic and economic impact of e.g. climate change or plastic waste in the ocean.

Our team currently goes through an exciting time. For us, new ideas and thinking outside of the box are highly valuable, as they have led to our recent successes. We all have different fields of expertise and responsibilities, but still strongly believe in teamwork to reach our overall goals. Bremen, where we are located, is a hotspot for state-of-the-art underwater technologies and offers a great lifestyle.

To grow planblue further, we are looking for a **Software Developer intern**:

Your responsibilities will include:

- Support the team with your programming skills
- Develop Kotlin, Java or Python Code for
 - AI pipelines
 - embedded systems
 - web services
- Work on user stories with the team

Qualifications we are looking for:

- Student of computer science
- Intermediate knowledge in Kotlin, Java or Python
- Mindset of a pragmatic programmer
- Self-responsibility and openness

What we offer:

- Extend your practical skills by working on the development of productive software
- A bright office between Unisee and Mensa with free drinks, organic fruits, a shower and music
- Flexible working and home office hours
- High-end hardware of your choice
- Be part of an international entrepreneurial group of people who strive for diversity

Does this sound interesting to you?

We look forward to receiving your motivation letter, CV and/or other information you might find relevant. Apply at planblue.join.com/jobs/1421769-software-developer
