
Position for
User Experience Intern (part-time, 25hrs/week, f/m/x)

Planblue is a diverse team of visionary entrepreneurs and engineers whose mission is to protect, explore and reveal the unknown 95% of our ocean by using cutting edge technology. We have developed the planblue technology which consists of A.I. backed software coupled with an underwater camera system that allows automated systematic monitoring of seafloors (e.g., coral reefs, lakes, oceanic shelves), providing geo-referenced maps. The maps can be used for various applications, for underwater constructions (e.g. off-shore wind), but also aid in reducing the ecologic and economic impact of e.g. climate change or plastic waste in the ocean.

Our team currently goes through an exciting time. For us, new ideas and thinking outside of the box are highly valuable, as they have led to our recent successes. We all have different fields of expertise and responsibilities, but still strongly believe in teamwork to reach our overall goals. Bremen, where we are located, is a hotspot for state-of-the-art underwater technologies and offers a great lifestyle.

We are looking for a **User Experience Intern** to join our team in Bremen. If the current situation allows you can work inside our office space close to the university Bremen, but you can also work completely remotely if you prefer / if that should legally be necessary.

Right now, we can only offer this position to enrolled students who have to complete a mandatory internship as part of their university curriculum with a duration of 3-6 months.

Depending on your qualifications your responsibilities could include:

- **User and Market Research.** Planblue has a vast spectrum of interesting users and customers. Our success as a startup is strongly connected to understanding these people as deeply as possible. Therefore you will support with planning and conducting user interviews and analysing them to uncover our user's hidden needs and problems. Your key responsibility in this scenario will be transcribing the interview videos to written text and identifying the highlights for our research database.
- **Workshops.** From time to time we host internal workshops at planblue to gather the knowledge of the whole company for a specific topic. You might support with preparing some of these workshops and - if you are qualified and comfortable doing that - moderate them to ensure best results.
- **User Interface Design.** The insights from user research will lead to requirements for our software engineering team. To help them build user-centered applications you might create wireframes and clickable interface prototypes.
- **Visual design.** Planblue is a young company and even though we have a defined visual identity there is still room to further develop and apply our corporate design. You might work on our internal presentation and documentation templates.
- **Video editing.** All of our user interviews are recorded on video if possible. Sometimes we will use the highlights of these interviews to show them internally or use them for pitches. If you have experience with video editing you could be in charge of creating such highlight videos.
- **Soaking up the knowledge.** Learn tons about underwater monitoring, entrepreneurship and UX.

Minimum Qualifications:

- You feel like you're up for the challenge and you have experience with executing some of the above-mentioned tasks.
- You have a flexible mind, enjoy challenging the team and yourself, are not afraid to give and receive feedback and know how to prioritize.
- You have an affinity for the ocean.
- You speak very good English.

Preferred Qualifications:

- You are studying or graduated in a design or psychology related field.
- You speak excellent English and German.
- You have experience with some these software tools – Keynote/Powerpoint, Miro, Adobe XD (or similar), Photoshop, Premiere.

What we offer:

- Apply your user-centered mindset to help our oceans.
- Be part of an international entrepreneurial group of people who strive for diversity, excellent results and love input from all team members.
- Learn what it feels like to build a company from the ground up.
- Flexible working and home office hours.
- A bright office between Unisee and Mensa with free coffee, drinks, organic fruits, a shower and music.

Does this sound interesting to you?

We look forward to receiving a short motivation letter, CV and some examples of your previous work. Apply <https://planblue.join.com/jobs/2184854-user-experience-intern>
